DEMOGRAPHIC SURVEY

The Health Foundation has had a long-standing commitment to promoting health equity and addressing social determinants of health, including underlying racial, social, and economic factors that affect health. To gain insight on the diversity of communities and organizations within our geographic service area and to gather data to evaluate our grantmaking processes, we are asking applicants to share available demographic information on the organization and the population(s) served. We acknowledge that diversity includes a broad range of backgrounds and perspectives, including but not limited to race/ethnicity, gender identity, age, immigration status, sexual orientation, socio-economic status, and physical and mental ability.

This survey was developed based on the Foundation's research on best practices in the field of health philanthropy as well as input from previous grantees and community stakeholders. *Participation is voluntary, and no proposal will be excluded from funding consideration based upon responses to this survey.*
